

European Union RoHS and WEEE Directives

The RoHS and WEEE directives contain exemptions applying to the equipment we sell, primarily when used in large scale industrial tools (LSIT) and when used for monitoring and control instrumentation. A large number of our customers use our equipment in these applications, so exemption is appropriate. For those applications that fall outside of these settings, there are some cases where a default exemption occurs simply because the application is not specifically documented in the scope of the directives. We are therefore strongly encouraging, but not requiring, our vendors to comply with RoHS and WEEE as soon as possible. Automation Direct supports the concept of environment-friendly products, and will encourage the same from our suppliers.

As a customer or potential customer of AutomationDirect, it is your responsibility to determine your obligation concerning RoHS and WEEE compliance. To assist you with this, Automation Direct publishes on our web site a listing of all products and their compliance status at http://support.automationdirect.com/docs/adc_rohs.pdf.

For additional information about RoHS and WEEE please visit the European Union Waste Management website at <http://europa.eu.int/scadplus/leg/en/lvb/l21210.htm>.
