

TECHNOTES

Using the 06,250(-1),260 to Communicate to a printer/data terminal

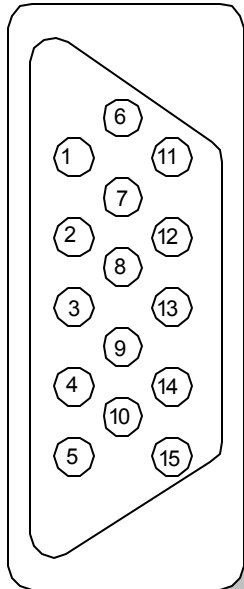

Product group: 205 series
Information Type: Communications
Last revised : 3 Dec, 2002

Port 2
15-pin SVGA
connector

RS-232C / RS-422
communication port

If you are close to a
Radio Shack store you
can purchase a 15-pin
HD male connector.
Their part # is 276-
1501

Make sure that Port 2 has been
configured in the 250 CPU, and that
the settings match the port on the
communication device being used.
(Baud rate, parity, data bits,
etc.etc...)

NOTE: In the 205 series the 250 CPU is the
only unit that supports the "PRINT" instruction .
