Dated: 23rd April 2025

Document Reference: 411-121116

Revision: 01

The following applies to all STB and STD snap on markers supplied by TE Connectivity.

RoHS Self-Declaration of Conformity

TE CONNECTIVITY hereby declares that our STD and STB markers are compliant to the EU RoHS Directive 2011/65/EU. The directive of the European Parliament came into force June 4th, 2015, as related to the restriction of the use of certain hazardous substances in electrical and electronic equipment, and the RoHS-3 directive that came into effect on July 22nd, 2019.

The following substances are involved at the levels identified:

- Do not contain Lead (Pb), Mercury (Hg), or Hexavalent chrome (Cr-VI), above 1000 ppm (0.1%) in each homogenous material.
- Do not contain Cadmium (Cd) above 100 ppm in each homogenous material.
- Do not contain the restricted types of Polybrominated Biphenyls (PBB) and Polybrominated Diphenyl ethers (PBDE) above 1000 ppm (0.1%) in each homogenous material.
- Do not contain the four additional phthalates added to the RoHS directive: Bis(2-Ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP), or Di isobutyl phthalate (DIBP) above 1000 ppm (0.1%) in each homogenous material. In situations where an exemption applies, the preceding limits, corresponding to the exempted substance(s), may be higher.

REACH Self-Declaration of Conformity

Although TE is principally a supplier of articles e.g. STD and STB markers, which do not require registration under REACH, we have completed the process of contacting our suppliers of “substances, mixtures, and articles” to ensure that all necessary registration requirements are met. This effort extends to all materials used by TE that are within the scope of REACH and regarding the applications in which those materials are used in our products. TE also engaged in the registration process for those few substances for which we are either a manufacturer or an importer.

TE has an ongoing effort to be compliant with REACH registration obligations and therefore does not expect any disruption in the supply of materials used in TE products or the supply of TE products to our customers.

STD and STB markers do not contain any Substances of Very High Concern (SVHC) however, TE are monitoring the bi-yearly additions of SVHC's to the Candidate List, which is the first step of the REACH Authorisation procedure. Please visit the ECHA website for the most up to date official version of the Candidate list: <https://echa.europa.eu/candidate-list-table>.
