LUTZE Inc – Policy on RoHS (EU 2015/863)

The European Directive RoHS or Restriction of Hazardous Substances originated in the European Union in 2002 to restrict the use of six hazardous substances found in electrical and electronic products. The first RoHS directive known as 2002/95/EC was passed into law and given an effective date of July 1, 2006. The original RoHS directive was replaced by directive 2011/65/EU which added RoHS compliance being mandatory for CE marking of products. The RoHS directive was revised again in 2015 to add an additional four substances to the list, bringing the total restricted substances to ten. The current RoHS directive is known as RoHS EU (2015/863) which has an effective date of July 22, 2019.

LUTZE Inc. requires direct confirmation from upstream suppliers that all materials and products we purchase do not contain any substances in the amount restricted by RoHS EU (2015/863) where applicable. All suppliers must make a declaration that their full supply chain has been duly examined to confirm this. LUTZE Inc. requires all upstream suppliers to update and maintain the most up to date RoHS declaration.

All products featured in the “LUTZE USA Cable Solutions for Industrial Automation” catalog have been evaluated to be compliant with RoHS EU 2015/863 where applicable and are marked as RoHS compliant in the document. RoHS compliance declarations for specific items are available upon request.

LUTZE Inc. is a member of the LUETZE International Group that has committed to maintain high standards on responsible and sustainable business practices. More information can be found here:
