FA-ISONET to PC wiring Diagram

Product group: Convertor
 Information Type: Communications
 Last revised : 15 Nov, 1999

WARNING : Do Not supply 24V to the Isonet if there is 5V power supplied through the Communication cable.

The Standard programming cable supplied by PLC Direct Loops RTS and CTS at the PC end. It does not carry the RTS line across. The FA-CABKIT does have connectors that make it easy to connect. It is listed in the PLC Direct catalog.
