

October 18, 2022

To Whom It May Concern:

In response to your inquiry regarding the Toxic Substances Control Act (TSCA) restriction of chemicals PIP, DecaBDE, TTBP, HCBd, & PCTP and their presence in the products we supply to your company, based on the information received from our suppliers and associated SDSs, these chemicals are not present in the products that we supply to you so we confirm to the best of our knowledge we are in full compliance with:

<https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/persistent-bioaccumulative-and-toxic-pbt-chemicals-under>

Read the final rules.

- [Final rule for decabromodiphenyl ether \(DecaBDE\)](#)
- [Final rule for phenol, isopropylated phosphate \(3:1\) \(PIP \(3:1\)\)](#)
- [Final rule for 2,4,6-Tris\(tert-butyl\)phenol \(2,4,6-TTBP\)](#)
- [Final rule for hexachlorobutadiene \(HCBd\)](#)
- [Final rule for pentachlorothiophenol \(PCTP\)](#)

AutomationDirect is not able to fill out individual surveys for TSCA compliance, or to provide individual product certifications, or to populate or upload this data to the various different reporting portals due to the volume and variety of these requests and the high number of customers that we have.

Regards,

*George Kaufman*
