

ENGINEERING CONSIDERATIONS (NOT FOR FIELD REPRESENTATIVE'S USE):

CNL - Indicates investigation to Canadian Standard CSA/CAN C22.2 No. 142-M1987.

USL - Indicates investigation to US Standard UL 508, 17th Edition.

CONDITIONS OF ACCEPTABILITY - When installed in the final use equipment the following are among the considerations to be made.

1. The cables are intended for internal use only.
2. The spacings, ratings, etc. recorded herein shall be judged in the ultimate application.
3. The acceptability of connections including temperature and secureness shall be determined in the ultimate application.
4. Consideration should be given to surface temperature of the connectors, components and wires with respect to the temperature classification of the end use equipment.
5. The Terminals are suitable for factory wiring only.
