

Durapulse GS4 Communication Card Versions

The following descriptions detail how to determine the **GS4-CM-ENETIP** or **GS4-CM-MODBUS** communication card hardware version and compatible FW versions.

Ensure which card type is applicable before upgrading firmware, as firmware is not compatible between card types.

V1.00 Hardware

Prior to Aug2019

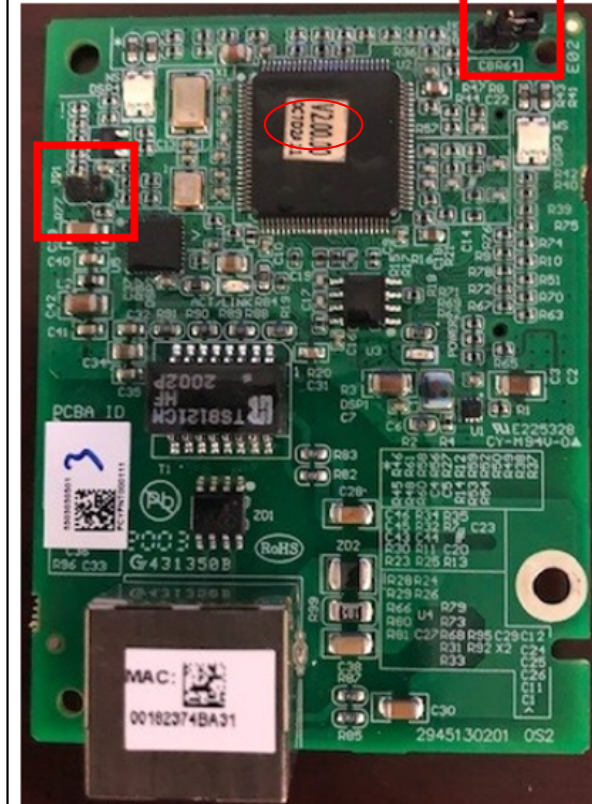

- No Jumper pins.
- V1.xx marking on main chip.
- FW file type is "*.BIN"
- Compatible with FW version 1.01 or 1.02 only
- Legacy card is no longer sold

V2.00 Hardware

Aug2019 and Later

Upgrade jumper

- JP1 and JP2 jumper pins.
- V2.xx marking on main chip.
- FW file type is WEB.
- Compatible with FW version 2.00 and higher only.
