Improvements:
1) Pen added to graphs for Ramp Set Point when in Ramp/Soak mode

Bug Fixes:
1) Communication with multiple units when set to RTU causes timeout disconnection
2) Alarm Setup (P3-8) item 11 or 12 - would not allow the user to set both (AL1H and / or AL1L)
3) Not able to change Additional Cycles in the Ramp/Soak Pattern Editor
4) Icon not displayed correctly for Windows 8 and up
5) Program description in Windows Task Manager incorrect
6) Reset to Default button available only when On-Line Configuration is set to Enable
