

LICENSE TO USE THE MSD SOFTWARE

This license governs the conditions of use of the MSD Software as dedicated to configure the security controller Mosaic, which is manufactured, commercialized and marketed by ReeR SpA.

ReeR SpA distributes the MSD Software free to all users of Mosaic security controllers (below: "the User"), such distribution not being intended, however, as a sale or transfer of ownership: the MSD Software remains an intellectual property fully owned by ReeR SpA, as provided for by national laws and international conventions concerning copyright.

The purchaser of Mosaic is entitled to use the MSD Software without further costs, such use, however, being restricted to the purpose for which it was developed, i.e. configuring the Mosaic security controller.

The User implicitly accepts to be bound by the conditions of this license when installing the MSD Software. Should the User not accept the terms and conditions of this license, he is not authorized to install and use the MSD Software.

OBLIGATIONS AND RIGHTS OF THE USER

1. The User of the MSD Software, before starting to use the Software, is required to read the associated user's manual fully, as contained in the distribution CD-ROM, with special attention to a proper understanding of the security warnings there contained.

2. The User is entitled to install and use the MSD Software on a computer that is legally available to him.

3. The User is authorized to make a back-up copy of the MSD Software.

4. Where the purchaser sells the Mosaic to a customer, he has the right to deliver to the customer the copy of the MSD Software in his possession, but only together with the Mosaic. His customer shall also be subjected to the same obligations as in this license.

5. Except as specified in paragraphs 3 and 4, the User is not authorized to make and/or distribute copies of the MSD Software. In particular, the User is not authorized to let the MSD Software fall into the public domain by making it downloadable from the Internet via a private site or any other platform, or through whatever other means, whether integrally or partially. Any public presentation of the MSD Software and publication of its screenshots or the like should be authorized on an individual basis by ReeR SpA, explicitly and in writing.

6. The User is not authorized to modify the MSD Software in any way, by

de-compiling it, decoding it, or otherwise altering it, and in particular the User should not remove or modify the copyright warnings when transferring the ownership of the MSD Software to third parties as provided for in paragraph 4.

7. The password entered as default must be modified to avoid manipulation (level 2 password) or so that the configuration loaded on Mosaic (level 1 password) is not visible.
